URSULA FRANKLIN

Radiating Knowledge

University of Toronto Archives

Dr. Franklin's commitment to her research and humanitarian work allowed her to make significant impacts in the world of STEM and everyday life. Her research on radioactive elements found in children's teeth led to a better understanding of the risks of nuclear testing.

Ingenium is committed to encouraging and empowering women and girls in science, technology, engineering, and math. Learn more at: ingeniumcanada.org/womeninstem/
