# SHELLEY DENNY

## Sustaining Knowledge

Unama'ki Institute  
of Natural Resources

Denny's research aims to use both Western and Indigenous knowledge to improve the sustainability of our oceans. She is particularly interested in the American eel and Atlantic salmon, which have important cultural significance in Mi'kmaq culture.

Ingenium, Department of Fisheries and Oceans and Canadian Commission for UNESCO are committed to encouraging and empowering women and girls in science, technology, engineering, and math. Learn more at: [ingeniumcanada.org/womeninstem/](https://ingeniumcanada.org/womeninstem/)
