SAMIRA MUBAREKA

Cracking the SARS-CoV-2 Code

Kevin Van Paassen/
Sunnybrook Health Sciences Centre

During the COVID-19 outbreak, Mubareka successfully led a collaborative effort to isolate the SARS-CoV-2 virus in a containment level 3 facility and sequence the genetic code, allowing medical researchers to develop new therapies and vaccines to fight the pandemic by broadly sharing material and data.

Ingenium and NSERC are committed to encouraging and empowering women and girls in science, technology, engineering, and math. Learn more at: ingeniumcanada.org/womeninstem
