KATE MORAN

From the Bottom Up

UVic Photo Services

Recognized as a leading expert in Arctic climate change and advocate for open data, Moran's research focuses on the study of ancient layers of ocean floor sediment. Under her leadership research teams are also pioneering ocean observing that includes ocean-based solutions for climate change mitigation as well as early earthquake and tsunami warning services.

Ingenium, Fisheries and Oceans Canada and Canadian Commission for UNESCO are committed to encouraging and empowering women and girls in science, technology, engineering, and math. Learn more at: ingeniumcanada.org/womeninstem/
