ANNA METAXAS

Ocean Health From the Bottom Up

Metaxas has worked in oceans around the world, studying corals, kelp, and other organisms that live on the ocean floor both near the coast and in the deep ocean. Through experiments, surveys and modeling, she helps governments develop policy to protect the ocean's environment.

Ingenium and NSERC are committed to encouraging and empowering women and girls in science, technology, engineering, and math. Learn more at: ingeniumcanada.org/womeninstem
