EMILY BAMFORTH

Deep-Sea Paleontologist on the Prairie

Parks Canada

As a paleontologist, Bamforth works on ancient marine life from the Late Cretaceous. She helped unearth the *Prognathodon*, an ancient marine reptile known as the *Tyrannosaurus rex* of the sea.

Ingenium and NSERC are committed to encouraging and empowering women and girls in science, technology, engineering, and math. Learn more at: ingeniumcanada.org/womeninstem
